

25' Carolina Skiff 258DLV

- Year: 2009
- **Current Price: US\$ 29,500** (10/10)
- Located in Key West, FL
- Hull Material: Fiberglass
- Engine/Fuel Type: Single Gas
- YW# 75995-2274595

This is a fully loaded 2009 Carolina Skiff 258DLV in mint condition. It has almost every possible option from the factory and is powered by a 2007 E-Tec 150 with only 346 hours. The owner originally used this engine on his previous boat before switching it to this improved and more capable hull. This is one of the most durable Carolina Skiffs ever built and is basically a floating Swiss Army Knife. It can be used for everything from a family fishing boat to serious commercial crab trap hauler. With its 18-person capacity it would also make an excellent water taxi or dive boat. Throw in a 29 mph cruising speed and a fuel burn of 4.1 mpg and this is Carolina Skiff becomes one of the best do-it-all values on the market.

The extras are almost too much to list but the electronics consist of a Lowrance LMS-337 color gps/fishfinder with transom mount transducer interfaced with the LMF-400 digital multi-function gauge. You can basically navigate anywhere in the in the hemisphere with this package.

Finally, there is a brand new model year 2011 Continental dual axle aluminum trailer included with the boat. It has disc brakes on all axles and only a few hundred miles of use. This trailer has only been in the water once and the boat has been dry stored on a rack ever since. The owner is looking to upgrade to a more bigger offshore hull so trades are possible.
